

EXTERNAL REVIEWERS 2019–2022

The mainstay of any peer-reviewed journal are its reviewers, and JLM is no exception here. Each paper is reviewed by at least 3 carefully selected reviewers, usually including at least one representing the JLM Editorial Board. To increase reviewing anonymity, we do not give the names of the 29 JLM EB reviewers, but we would like to heartily thank them for their hard and timely work. We also express our sincere gratitude to the following 99 external reviewers for papers reviewed during 2019–2022:
